

Why Buy a DeSite SLG-78?

- ◆ Screen sand, soil, rock, compost, wood debris and more
- ◆ Loads crossways using only 48 inches of deck space, leaving room for your buckets and machine
- ◆ Weighs only 1600lbs, so even small machines can lift and move the SLG-78 around the worksite
- ◆ Can be fed with buckets up to 78 inches
- ◆ Can be fitted with mesh from 1/8" to 4"
- ◆ Side tensioned mesh that can be changed in minutes
- ◆ No maintenance (no oil, grease or engine to maintain)
- ◆ Can be fitted with optional vibratory pack. Operating on 110 Volt electricity

 Hi Brad - Thanks for letting me use the SLG78. I got about 25 yds of gravel. About 60 yds of topsoil and lots of big rock. You asked me if it was worth \$100 a day. **Absolutely!** Thanks again! Alan
